	FLEXIMARK® Character holders PGS	07.11.2014

Pre-cutted FLEXIMARK® Character holders PGS for marking components in the electrical industry (as cabinets) with labels or character strips. For assembly with cable ties.

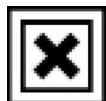

Good chemical resistance

Flame-retardant

Halogen-free

Acid-resistant

UV-resistant

Info

PGS 10-285 BK contained in FLEXIMARK® sample bag (article number M3251010)

Application range

For marking component groups in the manufacturing of control cabinets

Suitable for FLEXIMARK® Flexilabels LFL, MINI character strips as well as for DYMO® industry tapes

Fastening: bonding, or at temperatures > +45 °C with screws or rivets

Benefits

Easy to label

Flexible

Self-adhesive on many surfaces

Transparent cover MT ensures an additional protection of the label or the character strips

Diverse criteria as ageing resistance and chemical resistance are tested by the independent SP Technical Research Institute of Sweden according to SP 2171 Test Method (see selection table A15)

Product features

Extremely flame-retardant according to UL 94 V0

Remark

Photographs are not to scale and do not represent detailed images of the respective products. Contents: roll, metre, unit, marker, label

Technical Data

Colour delivered: Black, white, grey

Material: ABS plastic

Temperature range: -20 °C to +45 °C
